

Connecting to eduroam using Linux

You can download an [automatic configuration script](#) for some Linux distributions. When prompted for your College username and password, you will need to enter your username in the format username@eastleigh.ac.uk

Connecting manually

Some Linux distributions do not support the automatic configuration tool, and should use the manual settings.

- SSID: eduroam
- Encryption: 802.1X, WPA2-Enterprise
- User authentication settings: EAP/PEAP MSCHAPv2
- Username or Identity: Your College username in the format username@eastleigh.ac.uk
- Outer Identity: Leave blank
- Password: Your College password
